REMARKS

The abstract, specification, and claims were objected to for lack of "e"s. Applicant requests reconsideration. It is not understood by what is meant by "e"s. The cited references to the "e"s purportedly in the application were checked and no errors were found and the application seems to be in good order. Perhaps the text was garbled at the PTO during scanning. Applicant attaches hereto a copy of the application as originally filed. The application appearing to be in good order, and the claims having been informally allowed, save the traversed objection, applicant requests that the claims be formally allowed.

Respectfully Submitted

Servick Michael Reil
